

CAPTURE TRUST TOUCHLESS ID

One-stop shop for biometric identification

Identity.io delivers a complete suite of touchless biometric solutions to capture, verify, identify and issue identities securely — all from the smartphone.

1 MOBILE CAPTURE

Everything captured from the smartphone.

- Passive liveness detection
- On-device matching
- Injection attacks & deepfake protection
- Quality & interoperability controls

2 MATCH & IDENTIFY

Deduplicate. Verify. Scale.

ABIS/AFIS

- Face and fingerprint deduplication
- 1:1 verification and 1:N identification
- Latent matching
- Civil & criminal applications
- NIST evaluated

3 ISSUE & REUSE

Issue once and verify anywhere.

- Verifiable credentials
- Biometric-protected access
- Works offline

DESIGNED FOR HIGHLY SECURE ENVIRONMENT

Telecommunications

Digital Platforms

Fintech

Government

Banking

eKYC

Reduce fraud

Advanced anti-spoofing and identity analysis.

Improve Experience

Frictionless onboarding from any smartphone.

Lower Costs

No specialized hardware, optimized infrastructure.

Scale with Confidence

Built for large-scale biometric verification of millions of users.

REQUEST YOUR DEMO

SECURE, PRIVATE AND TOUCHLESS

Zero successful PAD attacks during DHS testing.
ISO 30107-3 Level 1-2 Certified.

FIRST-CLASS BIOMETRIC PERFORMANCE (Evaluated by NIST)

Top-ranked in NIST 1:N Fingerprint Identification

ELITE ACCURACY

99.99%

Match rate
(FNIR 0.0001)

in 4-4-2 configuration used for border control.

Outperforming global leaders in large database searches.

SUPERIOR SPEED

2.1 sec

Average identification search (1:N).

30%

faster than the next best competitor.

INFRASTRUCTURE EFFICIENCY

Top 3

in the world for quality with minimal infrastructure.

Substantially lower cost than traditional solutions.

REGULATORY COMPLIANCE & LOCAL PARTNERSHIPS

Identity.io helps organizations comply with local regulations, including telecom requirements for mobile line identification, passive liveness detection and official document validation.

In Mexico, for interactions with the INE, we offer 2D QR code scanning and facial authentication in collaboration with our partner FIMPE, increasing the success rate while ensuring complete data security, high quality, and competitive pricing.
